

# Barton Elementary Summer Camp

Its summer time! For The Children, Inc. and 21st Century Community Learning Center want to make it a summer to remember for our Barton Elementary students! During their time in the 21st Century around the world and back summer program, students will not only engage in project-based learning activities, but will also participate in hands-on lessons that are aligned to program and school-wide learning goals. Each week, students will also learn about different character traits that support their growth into more caring, responsible and respectful individuals. We will also focus on different cultures and learn facts about different countries around the world. The program will run Monday-Friday from 7:30am to 5:30pm on campus.

FTC's 21st Century Summer program offers the following opportunities to students and families:

- Academic enrichment
- Personal enrichment
- Health and Wellness opportunities
- Social Emotional Learning
- Family Empowerment Services

Thank you,

Meleshia Weller, Program Director
